The Berkeley Charleston Dorchester Council of Governments

The Berkeley-Charleston-Dorchester Council of Governments announces its consideration of amendments to the following document:

2021-2027 RURAL TRANSPORTATION IMPROVEMENT PROGRAM (RTIP)

&

BCD 2040 RURAL LONG-RANGE TRANSPORTATION PLAN (RLRTP)

This document is available for public review and comment from February 6, 2023 to February 27, 2023

Monday-Friday between the hours of 9:00 am to 5:00 pm at the

Berkeley-Charleston-Dorchester Council of Governments 5790 Casper Padgett Way North Charleston, SC 843-529-0400

Or at http://www.bcdcog.com/

Contact Person: Sarah Cox

¹ AC (Advanced Construction) reflects the use of state funds to initiate a project. Represents the commitment of state funds to satisfy the programming levels exceeding available federal funding in a given year.

² AC Conversion (Advanced Construction Conversion) reflects the conversion of state funds to federal funds in the future.

2040 BCD RURAL LONG-RANGE TRANSPORTATION PLAN
DRAFT AMENDMENT #4

Draft Amendment: February 27, 2023

Amendment #4 - BCD 2040 RLRTP (Highway and Transit Safety Performance Targets)

Federal regulations established through the FAST Act and maintained in IIJA/BIL, require state departments of transportation to establish and report annual safety performance targets. Per federal rules and SCDOT Planning Procedure Agreement PL-2017-01, MPOs and COGs are also required to formally adopt either the State's safety targets or evaluate and set regionally specific targets for highways. As such, the BCDCOG is amending the BCD 2040 Rural Long-Range Transportation Plan (LRTP) to include the annual safety targets set by the South Carolina Department of Transportation (SCDOT) for the 2023 performance period.

Recipients of public transit funds, are also federally required to establish annual transit related safety targets and report on the agencies' progress toward achieving set targets. Public transportation providers are further directed to share such information with MPOs/COGs and states so all plans and performance reports are coordinated. TriCounty Link (TCL), the region's rural transit service provider, has and will continue to share this data with the BCDCOG to facilitate its performance-based planning process. The BCDCOG is amending the 2040 RLRTP to include the transit safety performance measures and annual targets set and reported by TCL for the 2023 performance period.

PERFORMANCE MEASURES AND TARGETS -

Highway Performance

Through the federal rule-making process, the Federal Highway Administration (FHWA) requires state DOTs and MPOs to monitor the transportation system using specific performance measures. These measures are associated with the national goal areas prescribed in MAP-21 and the FAST Act. The following table describes the national goal areas, performance areas, and measures associated with Highway Performance.

Table 1: National Goal Areas and Performance Measures (Highways)

National Goal Area	Performance Area	Performance Measures
Safety: To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.	Injuries and Fatalities	Number of Fatalities Fatality rate (per 100 million VMT) Number of serious injuries Serious injury rate (per 100 million VMT) Number of non-motorized fatalities and non-motorized serious injuries
Infrastructure Condition: To maintain the highway infrastructure asset system in a state of goods repair.	Pavement Condition	Percent of pavements on the Interstate System in Good Condition Percent of pavements on the Interstate System in Poor Condition Percent of pavements on the non- Interstate System in Good Condition Percent of pavements on the non- Interstate System in Poor Condition
	Bridge Condition	Percent of NHS bridges classified as in Good Condition Percent of NHS bridges classified as in Poor Condition
System Reliability: To improve the efficiency of the surface transportation system.	Performance of the National Highway System	Percent of person miles traveled on the Interstate System that are reliable Percent of person miles traveled on the non-Interstate NHS that are reliable
Freight Movement and Economic Vitality: To improve the National Highway Freight Network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.	Freight Movement on the Interstate System	- Truck Travel Time Reliability
Congestion Reduction: To achieve a significant reduction in congestion on the Nation Highway System.	Traffic Congestion	Annual hours of peak-hour excessive delay per capita Percent of non-single-occupant vehicle traffic
Environmental Sustainability: To enhance the performance of the transportation system while protecting and enhancing the natural environment.	On-Road Mobile Source Emissions*	- Total emissions reduction*

Note - * This measure only applies to non-attainment or maintenance areas over a prescribed population threshold. This measure does not apply to the BCD planning area

Highway Safety

For the 2023 performance period, the BCDCOG accepts and supports the State of South Carolina's DOT safety targets for all five highway safety performance measures presented in Table 2.

Table 2: SCDOT and BCD Rural Planning Area Safety Measures Baselines (2017-21) and Safety Performance Targets (2023)

Measure	Traffic Fatalities	Fatality Rate*	Serious Injuries	Serious Injuries Rate*	NMU Fatalities and Serious Injuries
State Baseline (2017-2021) Average	1,058	1.88	2,859	5.073	458
State Targets (2019-2023) Approved	1,119	1.94	2,868	4.96	485
BCD Baseline (2017-2021) Average	40.6	2.25	79.4	4.428	10.6

Note - *Rate per 100 million vehicle miles traveled

This means BCDCOG will:

- Address areas of concern for fatalities or serious injuries within the rural planning area through coordination with SCDOT and incorporation of safety considerations on all projects;
- Integrate safety goals, objectives, performance measures, and targets into the planning process; and
- Include the anticipated effect toward achieving the targets noted above within the RTIP, effectively linking investment priorities to safety target achievement.

Transit Performance

Recipients and sub-recipients of public transit funds—which can include states, local authorities, and public transportation operators—are required to establish performance targets for safety annually and report on their progress toward achieving set targets. Public transportation operators are directed to share information with MPOs/COGs and states so that all plans and performance reports are coordinated. Table 3 identifies performance measures outlined in the National Public Safety Transportation Plan, released by the Federal Transit Administration (FTA), and in the final rule for transit asset management.

Table 3:National Goal Areas and Performance Measures (Transit)

National Goal Area	Transit Performance Area or Asset Category	Performance Measures			
	Fatalities	Total number of reportable fatalities and rate per total vehicle revenue miles by mode			
Safety	Injuries	Total number of reportable injuries and rate per total vehicle revenue miles by mode			
·	Safety Events	Total number of reportable events and rate per total vehicle revenue miles by mode			
	System Reliability	Mean distance between major mechanical failures by mode			
	Equipment	Percent of vehicles that have met or exceeded their Useful Life Benchmark (ULB)			
Infrastructure Condition (State of Good Repair: Transit Asset Management)	Rolling Stock	Percent of revenue vehicles within a particular asset class that have met or exceeded their ULB			
	Facilities	Percent of facilities within an asset class rated below 3.0 on the FTA Transit Economic Requirement Model scale			

Transit Safety

The region's rural transit provider, TriCounty Link (TCL), as required by the federal Public Transportation Agency Safety Plan (PTASP) final rule effective June 19, 2019, has developed a PTASP including processes and procedures implementing a Safety Management Systems (SMS) for the local transit agency. The BCDCOG Board of Directors certified TCL's Safety Plan, and adopted its annual Plan update on June 21, 2022. Included in Table 4 below are the agency's initial targets and summary of performance for the 2022 period, and the targets set for the 2023 performance period. The agency will report on progress and update targets on an annual basis, and coordinate with the BCDCOG to ensure that the goals, objectives, measures and targets set in the PTASP are integrated into the COG's planning processes.

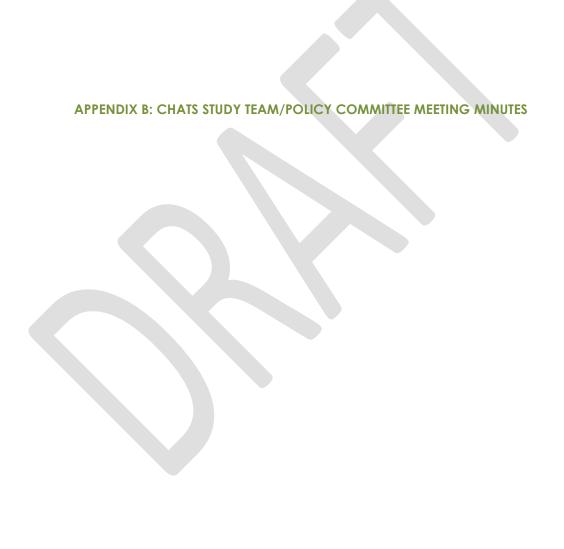

Table 4: TCL Transit Safety Performance (2022) and Safety Targets (2023)

Mode of Transit Service	Fatalities (Total)	Fatality Rate*	Injuries (Total)	Injuries Rate*	Safety Events (Total)	Safety Events Rate*	System Reliability**
All Bus Service (2019 Baseline)	0	0	5	5.35	10	10.7	25,000
All Bus Service (2021 Actual Performance)	0	0	2	4.1	8	16.5	92,432
All Bus Service (2022 Target)	0	0	5	0.7	10	1.4	60,000
All Bus Service (2022 Actual Performance)	0	0	2	0.28	9	1.3	71,321
All Bus Service (2023 Targets)	0	0	3	0.42	9	1.3	60,000

Note - *Rate per 100,000 vehicle revenue miles (VRM); **Average distance (VRM) between major mechanical failures

For the 2023 performance period the BCDCOG accepts and supports the safety performance targets set in the TriCounty Link PTASP. The COG will continue to work with TCL to achieve these targets.

A Berkeley-Charleston-Dorchester Council of Governments Program

MEMORANDUM

TO: Sarah Cox, Transportation Planner, BCDCOG / CHATS MPO

FROM: Jeff Hughes, Chief Safety Officer, BCDCOG

DATE: November 3, 2022

SUBJECT: Public Transportation Agency Safety Plan Performance Targets
CC: Kathryn Basha, Planning Director, BCDCOG / CHATS MPO; file

The Public Transportation Agency Safety Plan (PTASP) final rule was issued on June 19, 2018. The issuance of this final rule serves as a capstone for a collection of rules making up the Public Transportation Safety Program, including the National Public Transportation Safety Plan Rule, which defines the four performance measures for which transit agencies and MPOs have to set targets. The PTASP final rule has an effective date of July 19, 2019, and applies to transit agencies that are recipients and sub-recipients of FTA Section 5307 funding. Applicable transit operators are required to develop a PTASP including processes and procedures implementing a Safety Management Systems (SMS). The RTMA Board of Directors adopted its annual Safety Plan certification on June 21, 2022. Included below are the 2023 targets for the four safety measures, which is updated annually hereafter. In addition, the performance data shifted to the

FTA's PTASP regulation, 49 CFR Part 673, requires the state or transit agency that drafted the Agency Safety Plan to make its safety performance targets available to states and MPOs to aid in the planning process and to coordinate with states and MPOs in the selection of state and MPO safety performance targets. The MPO is responsible for integrating performance measures from PTASP into their planning processes in accordance with 23 CFR §450.306(d)(4) that states "an MPO shall integrate in the metropolitan transportation planning process, directly or by reference, the goals, objectives, performance measures, and targets described in other state transportation plans and transportation processes, as well as any plans developed under 49 U.S.C. Chapter 53 by providers of public transportation, required as part of a performance-based program..." The regulation lists nine plans that are among those the MPO must integrate into its planning process (23 CFR § 450.306(d)(4)(i)-(viii)), & the PTASP is one of them.

2023 Sat	2023 Safety Performance Targets (SPT) RTMA											
Mode of Transit Service	Fatalities (Total)	Fatalities (Rate)	Injuries (Total)	Injuries (Rate)	Safety Events (Total)	Safety Events (Rate)	System Reliability (Average distance between major mechanical failures)					
All Bus Services	0	0/100,000 VRM	3	.42/100,000 VRM	9	1.3/100,000 VRM	60,000 VRM					

2022	2022 Safety Performance Targets (SPT) RTMA												
	Mode of Transit Service	Fatalities (Total)	Fatalities (Rate)	Injuries (Total)	Injuries (Rate)	Safety Events (Total)	Safety Events (Rate)	System Reliability (Average distance between major mechanical failures)					
Target	All Bus Services	0	0/100,000 VRM	5	.70/100,000 VRM	10	1.4/100,000 VRM	60,000 VRM					
Actual	All Bus Services	0	0/100,000 VRM	2	.28/100,000 VRM	9	1.3/100,000 VRM	71,321 VRM					

RTMA established the goal to make transit safer for all customers, employees, and the local community through policy development, hazard investigation, data collection, risk analysis, effective oversight programs, and information sharing. Staff will continue to work toward improving processes to ensure the safety of its customers, employees, and the public with the goal of exceeding the performance measures established in the PTASP. RTMA aims to support a robust safety culture, and achieve the highest level of safety performance, meeting all established safety standards with a commitment to safety from the Board of Directors, to the executive leadership team to the frontline employee.

In summary, there were a total of **713,214 VRM**, 10 mechanical failures, 2 total injuries, and 9 total safety events.

Please feel free to contact me with any questions or for further information. We appreciate the coordinated effort with our member jurisdictions, the CHATS MPO, and SCDOT to improve safety for transit access and transit facilities.

*NOTE- The targets have been converted to the FTA standard of vehicle revenue miles (VRM) versus passenger trips, which explains the difference in performance data calculations from previous year.

Target SPT injuries (5)/ by annual expected VRM (713,214) X 100,000 =.70 per 100,000 VRM

Target SPT safety events (10)/ by annual expected VRM (713,214) X 100,000=1.4

Actual SPT system reliability 713,214/10= 71,321
