

Listing of Federally Obligated Projects

Fiscal Year 2019 (Oct. 2, 2018 – Sept. 30, 2019)

About BCDCOG

As one of South Carolina's 10 Regional Planning Councils, the Berkeley-Charleston-Dorchester Council of Governments' primary objectives are to assist local governments develop local and regional plans, and to provide local governments with planning and technical support to improve the quality of life in the tri-county region.

BCDCOG is a voluntary association of, by and for local governments. It was established to assist local governments in planning for common needs, cooperating for mutual benefit, and coordinating for sound regional development. BCDCOG's purpose is to strengthen both the individual and collective power of local governments and to help them recognize regional opportunities, eliminate unnecessary duplication, and make joint decisions.

About CHATS

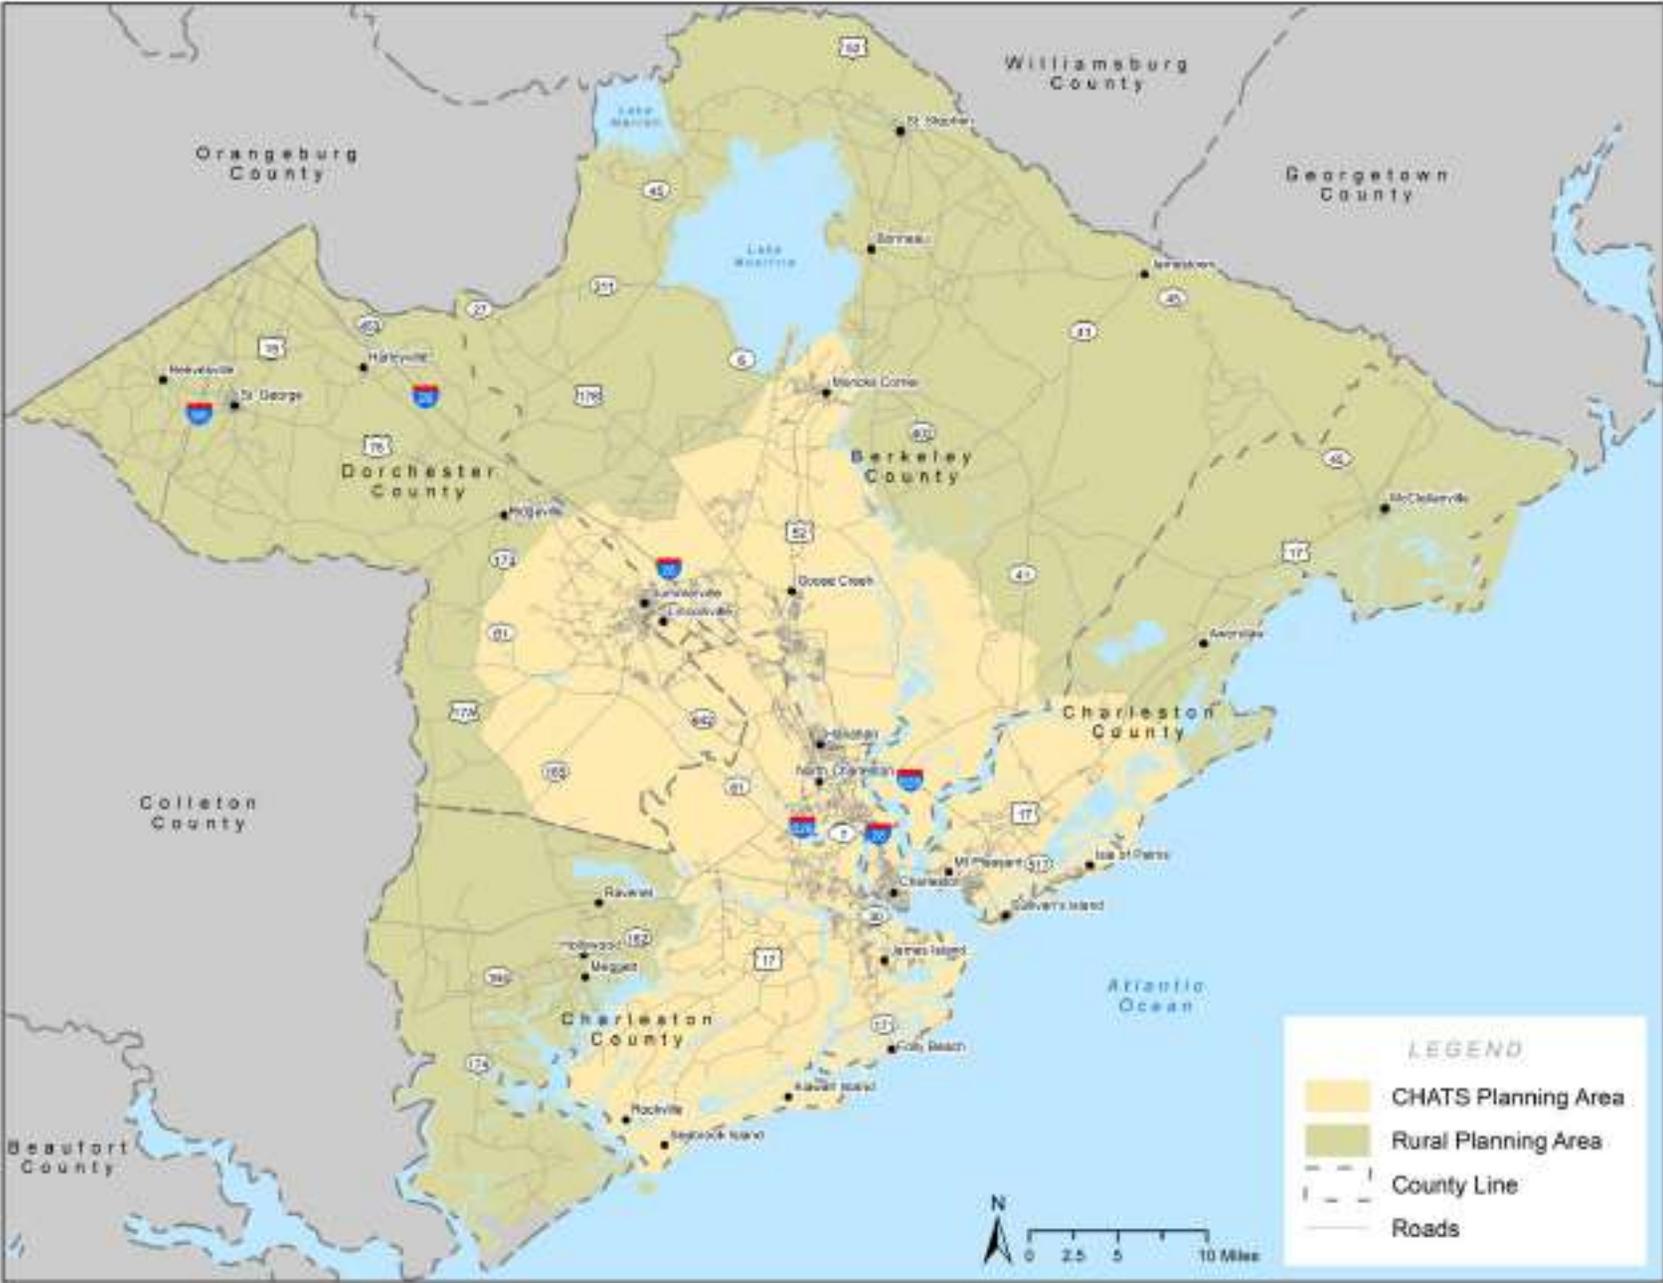

Under the direction of the BCDCOG, the Charleston Area Transportation Study (CHATS) is the Metropolitan Planning Organization (MPO) responsible for developing long range transportation plans for the Berkeley-Charleston-Dorchester region. The primary responsibilities of any MPO are to:

- 1) Develop a Long Range Transportation Plan (LRTP)- a 25-year (minimum) transportation vision for the metropolitan area; and
- 2) Develop a Transportation Improvement Program (TIP), which is the list of specific projects from the LRTP that have been programmed to receive federal funds.

Administration and implementation of the LRTP and TIP is guided by an annual Unified Planning Work Program (UPWP), which identifies the transportation planning activities that are to be undertaken in support of the goals, objectives and actions established in the Long Range Transportation Plan.

The CHATS MPO study area boundary covers around 950 square miles of the over 3,000 square mile BCD region and is composed of areas that are urbanized or expected to be urbanized (per Census definition) by 2030. The CHATS' governing board, the Policy Committee, represents governmental and transportation-related organizations from throughout its coverage area.

Introduction and Background

On December 4th, 2015, President Obama signed into law the Fixing America's Surface Transportation Act (FAST Act) which currently allocates federal funding for surface transportation programs. In an effort to improve the transparency of the expenditure of Federal transportation funds, Section 1201 of the FAST Act compels states and Metropolitan Planning Organizations (such as the Charleston Area Transportation Study, or CHATS) to annually publish those projects where federal funds were obligated or deobligated in the previous federal fiscal year (FFY). Specifically, states and MPOs must produce a report that shows *"the number of projects selected for funding for each fiscal year, including the aggregate cost and location of projects selected"*. To be included in this listing, an obligated project must be either entirely or partially located within CHATS' transportation planning area. The obligated amounts shown in the report are attributable to entire projects, including those which extend beyond the CHATS planning area.

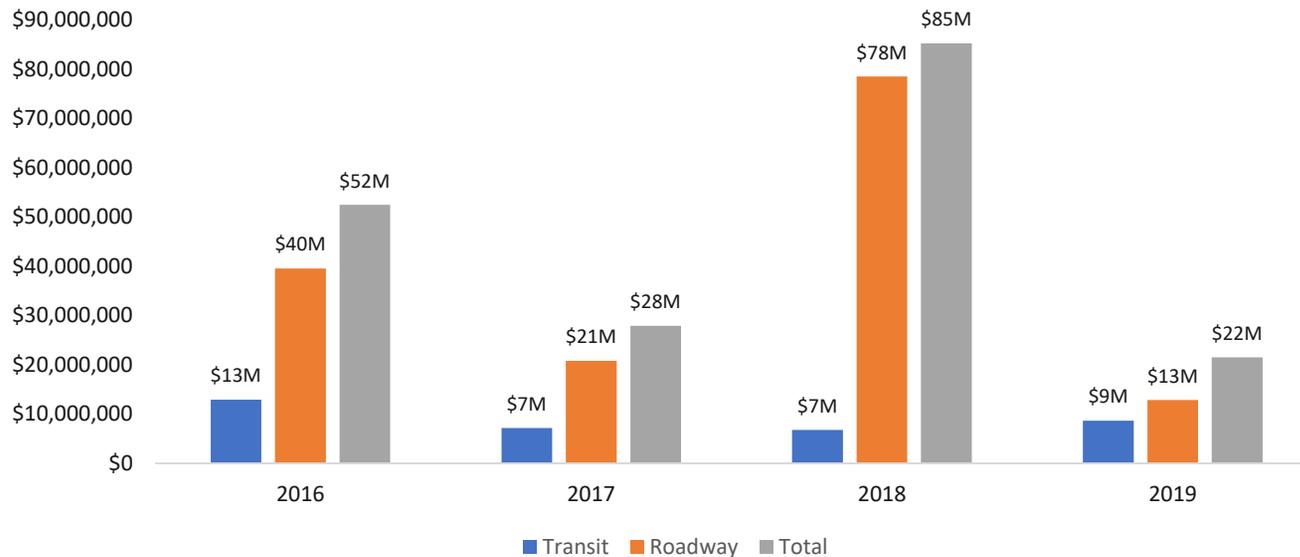

The State of South Carolina, public transit operators, and CHATS coordinate efforts to generate the information contained in this report. The report covers funding obligated during the period from October 1, 2018 to September 30, 2019, constituting Federal Fiscal Year (FFY) 2019. When made available by SCDOT, the Annual Listing of Federally Obligated Projects will be made available for public review and comment within ninety days after the end of the fiscal year. The listing is also be distributed at the regularly scheduled CHATS Policy Committee public meeting and posted on the BCDCOG website

Summary of Federally Funded Projects in CHATS Region

This report provides a summary of projects receiving federal funding during FFY 2019 to surface transportation improvements in the CHATS study area. An obligated project is a project that has been authorized by a federal agency and provides the federal government's legal commitment to pay the federal share of a project's cost. Projects for which funds have been obligated are not necessarily initiated or completed in the program year and the amount of the obligation will not necessarily equal the total cost for the project. For FHWA projects, obligation takes place when a project agreement is executed and the state/grantee requests that the funds be obligated. For FTA projects, obligation occurs when the FTA grant is awarded.

De-obligation occurs when obligated funds are returned to the federal government. This generally occurs when money that has been set aside for a project has not been fully spent. Thus, the promise of funds is returned to the federal government. The de-obligated funds are identified as negative federal obligation amounts (show in red) in the attached Listing of Federally Obligated Projects. The following table shows the amount of obligated funds for each project category as well as the number of projects in each category.

Approximately \$22 million in federal funds were obligated for transportation projects in the region in FFY 2019. This represents roughly one quarter of the amount allocated to the region in FFY2018. The decrease in allocated funding is primarily due to the fact that there were 17 more active projects in FFY2018 than in FFY2019 (70 projects compared to 53 projects, respectively). One particular project that had a substantial impact on the decrease in obligations was the I-26 / Jedburg Interchange Improvements Project (Project ID #P027077), which had a \$55 million federal transaction amount in FFY2018 and net deobligation of over \$6 million in FFY2019.

Obligated Project Types

Federal funding may be obligated towards improving and creating roads, roadway operations, bicycle/pedestrian facilities, bridge projects, and transportation enhancements. The FHWA projects represent roughly 60% of the federal funds obligated for transportation projects in the region. The FTA funds represent roughly 40% of the federal funds obligated for projects within the region.

The table on page 7 shows the amount of obligated funds, as well as the number of projects, in each project category.

Federal Transaction Amounts and Number of Projects by Category

Project Category	Net Federal Transaction	Number of Projects
Transit	\$8,661,636.00	5
Safety Improvement	\$7,885,508.34	9
System Preservation / Asset Management (Other)	\$3,912,699.14	3
System Preservation / Asset Management (Bridges)	\$3,799,994.35	6
Capacity Improvement (New Facility)	\$2,301,928.00	4
Planning & Corridor Studies	\$1,595,122.28	6
Safety Improvement (Intersections)	\$154,462.70	4
Complete Streets / Enhancement / Transportation Alternatives	(\$69,715.58)	6
Capacity Improvement (Widening)	(\$369,421.04)	2
System Preservation / Asset Management (Pavements)	(\$483,818.07)	5
Interstate	(\$5,904,342.59)	3
Total	\$21,484,053.53	53

Obligated Projects

On the following pages, FFY19 Obligated Projects are grouped by the project categories listed in the table above. Summary tables at the top of each category provide the names of the projects in each County and their net obligations/deobligations during the federal fiscal year. The detailed tables provide project ID's along with detailed information for each including a project description and obligations/deobligations by work phase, federal and non-federal funding sources.

Note that some projects are included in the CHATS Transportation Improvement Plan (TIP) and some are not. Projects that are not in the TIP are identified in the detailed table with Project IDs listed in **blue font**.

Below is a guide to some of the headings and abbreviations used in the tables.

- Project ID (PIN)** - SCDOT Project Identification Number assigned to track the project
- Project Name** - The name of the project including route designation and number, if applicable
(I = Interstate, US = United States, SC = State route, S = Minor state route)
- Project Description** - A brief description of the project
- Project Type** - Description of the project by type
- Project Work Phase** - Description of the type of work to be completed
(P = Planning, RC = Road Construction, BC = Bridge Construction, OC = Other Construction, ROW = Right Of Way, E&I = Engineering & Inspection, PE = Preliminary Engineering, U = Utility)
- Federal Obligation** - Amount of federal funds committed to the project
- Funding Category** - The federal/state program from which the funds were allocated
