Proposed MINOR Amendment to the Regional 208 Water Quality Management Plan

Kiawah River Utility Company is proposing a minor amendment to the Berkeley-Charleston-Dorchester Council of Governments (BCDCOG) Regional 208 Water Quality Management Plan to increase the Kiawah River WWTP capacity to 129,000 gpd by adding new Kubota MBR treatment units and aerobic/anoxic swing zones for operational flexibility. The project received BCDCOG approval in 2015 for a total of 440,000 gpd under a phased scenario. The increased capacity is within the 440,000 gpd flow approved by BCDCOG and is part of a phased capacity increase plan which also received approval in 2015.

Individuals with questions or comments concerning the proposed amendment may contact the BCDCOG at (843) 529-0400 between the hours of 9 AM and 5 PM. All comments must be received by 5 PM on Thursday, **December 5, 2024**. The Preliminary Engineering Report containing background information and justification for the amendment is available for public review at the offices of Thomas & Hutton, 682 Johnnie Dodds Blvd., Mt. Pleasant, SC and at the BCD Council of Governments' office 5790 Casper Padgett Way, North Charleston, SC 29406.
